tomer@libal.info

Summary

- I am a researcher, instructor and software engineer with extensive experience both in the industry and the academy. My academic specialization is in higher-order unification, proof certification, formal verification and theorem proving with emphasize on legal reasoning. I have experience in teaching of university level courses and have held a management position as a lead developer in a successful technology company.

- **Research Topics:** Automated Deduction, Proof Transformation, Legal Informatics and Formal Verification

- **Teaching:** Computer and Data Sciences

Experience

- **University of Luxembourg** — Belval, Luxembourg
  Researcher — *Jan. 2020 – Present*
  - Teaching courses in the BiCS program
  - A visiting researcher during Jan. 2021 - Apr. 2021

- **The American University of Paris** — Paris, France
  Assistant Professor for Computer Science — *Sep. 2017 – Present*
  - Lecturer during the academic year 2016-2017
  - Teaching courses on data mining, web development, software engineering, programming and other topics

- **Prosecco Team - Microsoft Research - Inria Joint Center** — Paris, France
  Research Engineer — *Jan. 2017 – Jul. 2017*
  - Ocaml and F* developer in the F* project

- **Parsifal Team - École Polytechnique/Inria** — Palaiseau, France
  Researcher — *Jan. 2015 – Dec. 2016*
  - Research on proof certification and unification on ERC advanced grant ProofCert
  - Reference: Dale Miller, head of the group

- **École Polytechnique** — Palaiseau, France
  Teaching Assistant — *Mar. 2015 – Aug. 2016*
  - Teaching assistant to courses in the Master degree program
  - Supervision of student projects and interns

- **Microsoft Research - Inria Joint Center** — Palaiseau, France
  Researcher — *Oct. 2012 – Dec. 2014*
  - Research on theorem provers and proof assistants for the TLA+ proof language
  - Modeling and verifying real time systems using the TLA Proof Assistant and Model Checker
  - Reference: Leslie Lamport, head of the group

- **Theory and Logic Group - Vienna University of Technology** — Vienna, Austria
  Project Assistant — *Nov. 2008 – Sep. 2012*
  - Researching algorithms for higher-order unification and resolution
  - C, C++ and Scala developer in the Generic Architecture for Proofs project
  - Reference: Alexander Leitsch, head of the group

- **Quigo Technologies** — Tel Aviv, Israel and New York, USA
  Programming Team Lead — *Sep 2001 – Jan 2006*
  - In charge of a Big Data team developing search marketing solutions
  - In charge of all the company database integration development, HTTP server side development, software deployment and continuous integration
  - The company was merged[1] into AOL

- **Various Companies** — Jerusalem, Israel
  Java Programmer — *1998 - 2001*
  - Surfnotes and VerticalNet Solutions
  - Was employed as an OOP consultant to a formal text book used by computer students in Israel

Education

- **Vienna University of Technology** Vienna, Austria
  Ph.D. in Computer Sciences *2008 – 2012*
  - Ph.D. Thesis - Unification in Higher-order Resolution

- **Vienna University of Technology** Vienna, Austria
  M.Sc in Computer Sciences *2006 – 2008*
  - Master Thesis: Cut Elimination in Inductive Proofs of Weakly Quantified Theorems

- **The Hebrew University** Jerusalem, Israel
  B.Sc in Computer Sciences *1998 – 2001*

Academic Activities and Awards

- I am the principal investigator of the FNR ProofOfConcept icomplai project (€199.100, 5/21-4/23)

- I am the principal investigator of the FNR PathFinder PaCT project (€22k, 4/20-9/20)

- My paper "NAI - Towards Transparent and Usable Semi-Automated Legal Analysis" has won the best paper award in IRIS 2020

- Was awarded the Erasmus Mundus scholarship for the European MSc programme Computational Logic for the academic years 2006-2007 and 2007-2008

- Reviewer for JAR, Organon F, Axioms, CADE, FSCD and various workshops, AEC member of POPL 2017 and PC member of Tableaux 2019 , PxTP 2017, PAAR 2020, IJCAI 2020, CADE 2021 and EXTRAAMAS 2021

- A reviewer for Mathematical Reviews of the American Mathematical Society (since 1/20)

- Invited talks in the ReMeP '19 conference, EMCL workshop and in dedicated seminars in Universite Paris Diderot, Universite Savoie-Mont Blanc, ENS Cachan and others

- Thesis supervision of one master and three bachelor students

Software

- The original creator and a lead developer of the GAPT framework. ∼100k lines of Scala code.

- The original creator and a lead developer of the NAI normative reasoner. ∼15k lines of JavaScript code.

- A lead developer of the Checkers proof checker. ∼2k lines of Prolog code and shell scripts.

- A lead developer of Quigo's FeedPoint tool and a major contributor to Quigo's AdSonar tool. ∼150k lines of Java code.

- A major contributor to the TLA+ Proof System. ∼37k lines of OCaml code.

- A minor contributor to the F* language. ∼300k lines of OCaml, F# and F* code.

- A minor contributor to the Leo III theorem prover. ∼30k lines of Scala code.

- Various tools for education and research in different programming languages.

Teaching

- Discrete Math 1. FA20.

- Information Management 2. SP20.

- Intro to Web Authoring. FA16, FA17, FA18, SP19, FA19, SP21.

- Database Applications. FA16, FA18, SP21.

- Software Engineering. FA16, SP18.

- Advanced Java Programming. SP17, SP18, SP19, SP21.

- Data Science. FA17, SP19.

- Web Applications. FA17, FA19.

- The Symbolic Mind. FA18, FA19.

- Les principes des langages de programmation. SP15, SP16. (TA)

- Computational Logic: Artificial Intelligence in Mathematical Reasoning. FA15. (TA)
